\*Benchmark is the MSCI World ex Australia Index. \*\*Risk is defined as Beta and sourced from Morningstar Direct. A Beta of 1.00 represents equivalent risk to the Benchmark. A minimum of 12 months data is required for this calculation.

### Monthly performance review

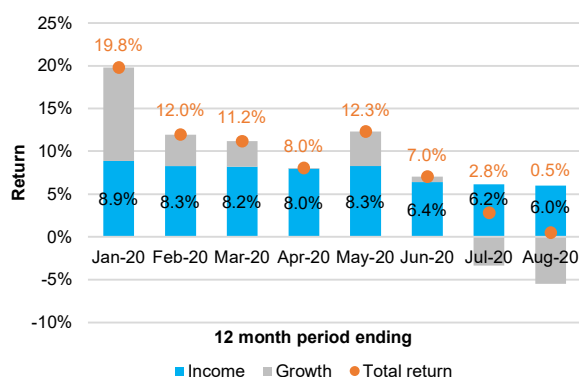

The Fund returned (0.22%) in August, behind the benchmark return of 3.47%. This return comprised:

- a return of 2.90% from the portfolio (in USD); and
- a negative return of (3.12%) from the strengthening of the Australian dollar versus US dollar.

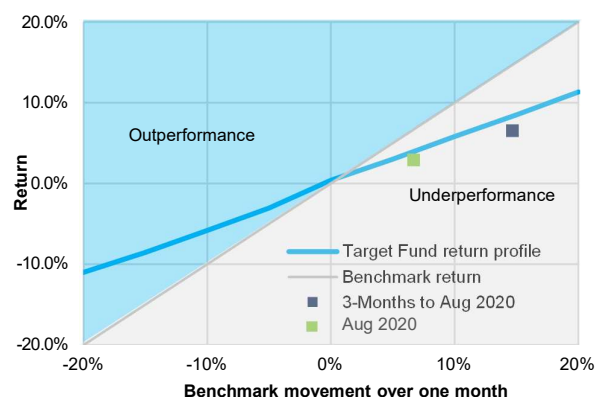

### Income and protection

The strategy's high-income generation and active tail risk program are designed to lower risk and deliver equity returns with a smoother, more retiree-friendly return profile. As a result, returns are expected to add relative value in weak and low-growth markets, and to drag in more positive markets. We assess this return profile in USD to strip out the influence of the AUD/USD currency movements.

### Income vs total return (12 month rolling)

### Targeted monthly return profile

Source: Wheelhouse

Wheelhouse is a retirement solution designed to deliver better investment outcomes to Australian retirees. Our philosophy is based on three pillars:

- investing in global equities as a **growth asset** to address longevity risk;
- shaping returns to be **retiree-friendly** with lower volatility, better capital preservation and consistent income; and
- delivering a **lower cost** solution to help improve outcomes.
